

Glamorous glitter effects: Textliner Metallic in new colours

“My favourite colour is glitter”: all those who live by this motto and prefer to use pens with shimmer effects can now expand their collection with some beautiful new options. Faber-Castell is launching the popular Textliner 46 Metallic in four new colours: Shimmering Violet, Glorious Red, Precious Green and Magnificent Blue. With these, glamorous, sparkling accents can be added – as highlights in your bullet journal, a creative way to add variety to your handlettering, sparkling decoration for traditional letters or a cool eye-catcher on your studygram, increasingly important now that digital teaching is becoming more common. This stylish quartet impresses with the proven Textliner Metallic quality features: the long-lasting wedge tip comes in three different line widths and the environmentally friendly water-based ink is ideal for all standard paper types.

Textliner Metallic: from EUR 1
available from December 2020
