

Summer feeling on the desk: Sparkle pencils in pink, orange and black

Constantly staring at a white desk can be rather boring at times. A touch of colour provides new verve – if the combination is right. This is fair to say about the new Sparkle trio in pink, orange and black. The two colourful pencils are absolutely striking while black creates the best contrast. The three new products from the successful pencil line with glitter design conjure up the spirit of summer when everything is a bit more bold, colourful and accentuated. The Sparkle collection is not just beautiful, it is practical as well: thanks to the ergonomic triangular shape, these writing accessories ensure a good and stable writing experience.
