

Highlights in white: the new Pitt Artist Pen white

From precise, even lines to dramatic shading: the new Pitt Artist Pen white now gives artists the flexibility they need to bring their ideas to life. This artist's tool from Faber-Castell offers four different tips at once which create full-coverage highlights, apply various shading techniques or blend colours. The pen can be applied just as effectively on dark-coloured paper in order to create contrast and shading. The Pitt Artist white is also ideal for calligraphers who are mastering the art of lettering or zen doodling. It is available in different versions: The **Pitt Artist Pen Brush**, which has a soft tip that still retains its shape, allows for a seamless transition from thick to thin lines. Hand-written texts and lettering are made easy with the wedge tip of the **Pitt Artist Pen Calligraphy**. The **Pitt Artist Pen Bullet nib** with a 1.5 or 2.5 millimetre tip ensures a consistent line with a high level of coverage. It is available in stores for individual purchase or as part of a four-piece set together with the black Fineliner Pitt Artist Pen S.
